

EAA 1310 Annual Tail Wheel Fly-IN and Safety Day! Changes, None, Just a Reminder

Don't miss this multi-part safety event featuring tail-wheel operations, emergency procedures and human factors. Proficiency in the aircraft that you fly has a direct relationship to the safety of your flying operations. This is true for all aircraft and especially tail-wheel aircraft. How proficient are you? This event will also feature the story of a pilot that carefully planned a long cross country flight just to have an engine failure while enroute. We will also review numerous accidents to determine if the choices that we make differ from those of the pilots involved. Let's learn from the mistakes of others! COFFEE and DONUTS at 09:00 and a COOKOUT to follow the seminar! Click on the link below to register TODAY!

Directions: Skylark Airpark is located 1/2 mile south of the CT-RT 140 intersection. Event is held in the hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
